I feel more empowered to help patients reduce their [analgesics] as the evidence shows they don't work. I will also be able to signpost to Arthritis UK and other members of the MDT

Response to: How will this training benefit your patients?

Of the delegates who completed the evaluation survey, 100% said the learning aims were met. Improvements were seen across all self-assessed areas; including confidence diagnosing and treating and MSK examination skills.

Next steps are to identify which of our training courses would best meet your needs and secure a future date.
