

North and West Belfast GP Federation Managing Chronic Pain in Primary Care

13 November 2025

100%
of attendees would
recommend this
event/training

Average %
improvement
= 67%

Better assessment for
new patients
presenting and setting
better expectations
from the start of their
pain journey.

Response to: How will
this training benefit
your patients?

Of the delegates who completed the evaluation survey, 100% rated the overall satisfaction as excellent or very good. Improvements were seen across all self-assessed areas; including confidence diagnosing and treating and MSK examination skills.

**Next steps are to identify which of our training courses
would best meet your needs and secure a future date.**
